

Environmental Management Statement

Charter Tech believes that the company is responsible for achieving good environmental practice and operating in a sustainable manner. We are therefore committed to reducing our environmental impact and improving our environmental performance as an integral part of our business strategy and operating methods. In pursuance of these goals, we will:

- Minimise our waste and recycling where possible.
- Minimise energy and water usage in our buildings, vehicles and processes
- Operate and maintain any company vehicles with due regard to their environmental impact
- Apply the principles of continuous improvement to minimise air, water, noise and light pollution from our premises and reduce any impacts from our operations on the environment and local community
- As far as possible purchase products and services that do the least damage to the environment and encourage others to do the same.
- Apply measures to handle, store and dispose of substances subject to the Control of Substances Hazardous to Health Regulations 2002.
- Assess the environmental impact of any new processes or products we intend to introduce in advance.

In support of this commitment, we will:

- Regularly review the suitability of our environmental policy so that it is fit for purpose.

Charter Techs' management team will uphold these environmental objectives, and ensure that this policy is understood, implemented, and maintained at all levels in the organisation.

Effective implementation of this policy requires that all members of staff are aware of their responsibilities for minimising the environmental impact of our products and services. This will be achieved through active engagement with our management systems. Where necessary, the company will provide training and support, to assist colleagues in discharging their responsibilities.
