

Functional Safety Management Statement

Charter Tech is committed to ensuring that safety-related systems and functional safety-related design / consultancy services that the company supply are compliant with the requirements of BS EN 61511-1 when specified by our customers

In pursuance of these goals, we will:

- Develop a functional safety management system to sit alongside our Quality Management System, which is designed to meet the requirements of BS EN 61511-1:2017
- Appoint a member of the management team to act as the focal point for all matters relating to functional safety.

In support of this commitment, we will:

- Regularly review our functional safety objectives.
- Regularly review the functional safety management systems' continuing suitability so that it is fit for purpose.
- Strive to continually improve the system.

Charter Techs' management team will uphold these functional safety objectives, and ensure that this policy is understood, implemented, and maintained at all levels in the organisation.

Effective implementation of the policy requires that all members of staff are aware of their responsibilities for the functional safety assurance of our products and services where this is required. This will be achieved through active engagement with all of our management systems. Where necessary, the company will provide training and support, to assist colleagues in discharging their responsibilities.
